

RECYCLING PET

BIG BENEFITS WITH LITTLE EFFORT

LOOK AFTER THE ENVIRONMENT

PET is a 100% recyclable material. Recycling PET saves energy and oil because old bottles are used to make new ones.

SAVE MONEY

Handing in PET drinks bottles for recycling is free. This means you can save some money as you help to save the environment.

A CONVENIENT SYSTEM

All outlets selling PET drinks bottles take empty bottles back. It's convenient to return your bottles when you go shopping without having to make a special trip. There are also other public collection points such as council facilities, petrol stations and kiosks.

PLEASE ONLY DISPOSE OF
BOTTLES WITH THIS SYMBOL
IN THE «PET» CONTAINER.

IF YOU'RE NOT SURE WHETHER SOMETHING BELONGS IN THE PET CONTAINER,
ASK YOURSELF THESE THREE QUESTIONS:

- › **IS IT A BOTTLE?**
- › **IS IT MADE OF PET?**
- › **DID IT CONTAIN A DRINK?**

If the answer to all of these questions is yes, the bottle should go in the PET container. All other bottles should go in the separate container for plastic bottles, which can be found at most major retailers (e.g. Migros, Coop etc.). Blister packs, bowls and cups should be disposed of as general waste.

› **TIP: AIR OUT, LID ON!**

FLATTENING PET DRINKS BOTTLES SAVES SPACE AND
THEREFORE ENERGY AND COSTS.
